

We claim:

*Sub B1* 1. Protein and peptide free composition useful in treating endotoxemia, comprising:

(a) at least one neutral lipid at an amount equal to from about 3% to about 50% by weight total lipid in said composition, and

(b) at least one phospholipid.

2. The protein and peptide free composition of claim 1, wherein said neutral lipid is a triglyceride.

3. The protein and peptide free composition of claim 1, wherein said phospholipid is a phosphatidylcholine.

*Sub B2* 4. The protein and peptide free composition of claim 1, wherein said at least one neutral lipid comprises cholesteryl ester.

5. The protein and peptide free composition of claim 1, further comprising sphingosine.
